

NCT07563036: JAK2 Expression in Androgenetic Alopecia Before and After Topical Minoxidil

Gender: MALE

Age: 18 Years - 50 Years

Criteria:

Inclusion Criteria:

- * Male adults aged 18 to 50 years with androgenetic alopecia.
- * Mild to moderate disease severity, defined as Hamilton-Norwood scale II to V.
- * Patients who are treatment-naïve or willing to undergo an adequate washout period for prior hair loss therapies of at least 1 month.
- * Willing and able to provide written informed consent.

Exclusion Criteria:

- * Other types of hair loss, including inflammatory or scarring alopecia.
- * Inflammatory scalp dermatoses, such as psoriasis or seborrheic dermatitis.
- * Use of systemic immunosuppressants, JAK inhibitors, or systemic corticosteroids within the last 12 months.
- * History of severe systemic disease, including renal, cardiovascular, or hepatic disease.
- * Chemotherapy during the last 5 years.
- * Bleeding disorders.
